**Subject:** Microsoft Settlement

I am the Information Systems Manager for a company that employees approximately 150 people in Minnesota. I am greatly disappointed with the settle between Microsoft and Justice. Microsoft is a monopoly and has used that power to the disadvantage of the consumer. This settlement does nothing to encourage Microsoft to change its business practices and I fully support the nine states that are continuing the fight for a better settlement. We use Microsoft products because we have no choice not because their technology is the best.
